You may have calculated the length of your pregnancy from the first day of your last menstrual period LMP . The dating scan is an ultrasound that can be done from seven weeks of pregnancy but they usually happen a little later. It s the best way to predict your due date Butt and Lim 2014, PHE 2014, SOGC 2019,

Van den Hof et al 2019 . The common first step will be a dating scan between 7-10 weeks as we like to check your baby before 10 weeks. Why scan at 7 weeks An ultrasound is performed at this stage of pregnancy to confirm your due date, confirm if you are having singles, twins or more and to visualise your baby s heart beating. 11.07.2018 0183 32 A dating scan is a method that is used to reliably assess the age of a foetus with a maximum error of 3 to 5 days. A dating scan is for women who have the following issues Not all menstrual cycles happen like clock-work. While some come early, there are others that come a bit later. A dating scan works out more precisely how many weeks pregnant you are based on the size and development of your baby at the time

of the scan. The NHS offer dating scans at around 12 weeks of pregnancy, however, you may feel that you want more information on your pregnancy earlier than that. 01.08.2016 0183 32 A dating scan shouldn t hurt, but sometimes the sonographer does have to press quite hard on your tummy, which can be a bit uncomfortable, and may leave you with a few bruises. If your baby is moving around a lot, or if you re overweight or obese, it can be more difficult for the sonographer to get a good view of your baby. Dating Scan scanme.
