## RATIONALE

The key idea behind this desk analysis is to map and analyse the existing material, resources and tools within the following five pillars:

1. Civic Engagement,
2. Quality and Competences,
3. Social Impact and
4. Youth Policy

The listed pillars are important for identifying resources and ensuring their visibility, as well as for identifying gaps and enabling the development of new tools and resources for each of the subject areas. These pillars were selected as the result of trends in contemporary research, existing practices within the youth field, and based on the recommendations of the [\*The Power of Learning Mobility – changing lives, changing society\*](#) conference held in Ostend, Belgium, April 2-4, 2019.

## INTRODUCTION

***Civic engagement*** of young people is the main precondition for a democratic society. Solidarity is the key focus in all the current civic engagement discussions, and non-formal education and mobility projects can be very important tools for solidarity among individuals and within societies. The civic engagement repertoire has changed and diversified in contemporary societies. In addition to the universal channels of participation, young people are increasingly using online activism, protest policies, ethical consumption, and other forms of activism. However, research shows that civic engagement concepts differ from one country to the other and that youth practices in the European countries still vary significantly. There are also differences in education curricula as different levels of importance is placed on developing democratic competence. In addition, practical policies at the national level are significantly diverse as well. In this scenario, the issue of youth activism and the radicalisation of youth and what civic engagement can offer require special attention within the youth field.

***Quality and Competences.*** The EU Youth Strategy, The EU Agenda 2030, Solidarity Corps, as well as activities within the Youth Partnership provide important support to improve and increase the quality of projects that focus on learning mobility. Notwithstanding, and despite this meaningful contribution, there is still room for improvement in the field. The main developments on the quality and competences pillars are quality standards implementation mechanisms, especially in daily practices. The competences that an individual can acquire depend on the goals of the learning mobility programmes, as well as on the role taken up by

the individual. Even though mobility programmes usually defined competences before the mobility takes place, the key research challenge remains on how to measure competencies.

The analysis presented in this report is divided into five main parts. The first part emphasises the importance of learning mobility; the second defines different ways of recognising and measuring social impact; the third part discusses the aspects of different process mechanisms, monitored and measured; the fourth part presents the main findings and conclusions, while the fifth provides a list of tools and resources in this field.

## On Learning Mobility

The importance of learning mobility cannot be stressed enough. Learning mobility has a prominent role in the EU policy framework, as well as within national frameworks at European level. The conclusions from the last conference [The Power of Learning Mobility – changing lives, changing society](#) indicate that learning mobility has multiple effects on participants, the local community, the national context and Europe. Consequently, researching and monitoring the ways in which different types of activities contribute to social cohesion is crucial.

Leading EU strategic and policy documents put youth mobility at the top of their priorities. The European Union Youth Strategy points out to the importance of youth mobility in Europe as a tool that helps maintaining and improving solidarity: “Young people in Europe are getting more and more connected. Connections, relations and exchange of experience are a pivotal asset for solidarity and the future development of the European Union. This connection is best fostered through different forms of mobility. “(European Commission 2018: 4). The EU Youth Strategy invites member states and the European Commission to “Enable access for all young people, as well as for youth workers, to cross-border mobility opportunities, including volunteering in the civil society sector, by eliminating obstacles and implementing support measures with special attention to young people with fewer opportunities” (Ibid). With the aim of improving the mobility, in addition to its ongoing programmes (ERASMUS+, Europass, etc.), the EU has introduced a special programme – the European Union Solidarity Corps. This initiative has at its core “to provide young people with the support of participating organisations, with easily accessible opportunities for engagement in solidarity activities effecting positive societal change, ... as well as facilitating their active citizenship, employability and transition into the labour market, including by supporting the mobility of young volunteers, trainees and workers” (European Solidarity Corps 2018: 6).

The Council of Europe (CoE) also modified its policies in the last few years. Two key documents adopted by the CoE are the [Competence framework for democratic culture \(CDC\)](#) - which improves the framework for development of competences -, and the [Recommendation \(2017\)4 on Youth work](#). The latter states that in order to young people transition into adulthood and have an active role in society and labour market, “the package needed is a mosaic of enabling and formative experiences in addition to formal schooling,

such as mobility, exchanges, advice and information, counselling, guidance and coaching, engagement with new technologies and social media, and social and political participation”.

Within the framework of the Council of Europe and the European Commission's, and more precisely, the Youth Partnership in the Youth field, there is a special body the European Platform for Learning Mobility (EPLM) that works in monitoring and improving youth mobility.–The EPLM has developed several analyses and recommendations on youth mobility. The EPLM's initiative [A Quality Framework for Learning Mobility in the Youth Field](#) and [Indicators for Quality in Learning Mobility](#) has special significance since the focus is not only on mobility projects for and with young people, but because it also covers youth workers and leaders who work with youth. Additionally, the EPLM has an important role setting quality standards for learning mobility projects and providing guidelines for monitoring and improving the quality in this field.

## Social Impact

Even though the impact of learning mobility on individual level (programmes' participants) has been a frequent research topic, the importance of mobility on the social level is not a thoroughly researched and explained phenomenon. There are relatively few studies that look to the impact of learning mobility on the social environment participants travel to and on the social environment to which they are returning to upon completing the mobility project. As Garbauskaitė-Jakimovska concludes “the impact of learning mobility on communities is to the most extent implied, but rarely supported by data, evidence or actual research with the members of local communities...” What would be interesting to know is the details, the exact experiences that members of communities had while interacting with the participants of learning mobility and how it affected their lives, or the actual initiatives that are undertaken by former learning mobility participants after they return home and how members of communities perceive them.“ ([Garbauskaitė-Jakimovska 2018](#): 28).

Research also indirectly shows that learning mobility can lead to the development of new social inequalities just as much as it can lead to increasing social cohesion. The question of who applies for the mobility programmes inevitably opens the subsequent question of how these can contribute to creating/reproducing class differences, as the members of middle class are more likely to participate in mobility programmes. Another question that can be raised is whether the participation in mobility programmes is the only factor that creates the social divide between those who leave and those who stay. Questions like these reveal gaps in knowledge, and in order to fill those gaps, we need more longitudinal and comparative research.

## Resources and Tools

Tools and resources which will be analysed in this desk research are divided into:

1. Various tools developed to help the youth
2. Academic and research tools (comprised of Academic/ Scholarly/ Studies/ Case Studies/ Books/Articles)
3. Projects and initiatives
4. Official reports
5. Web resources, blogs

Institutions and organisations with mandates in the youth field use the aforementioned different tools to achieve better results in terms of youth empowerment and to include the larger number of young people possible, from different social groups. Furthermore, the same tools help making the content more interesting and appealing to young people and achieve the higher degree of social inclusion and higher social cohesion. Some of the frequently used resources and tools used in youth organisations are different manuals, exercises, video material, courses, workshops, reports, presentations, MOOCs (Massive Open Online Course) etc. In addition to those, there is also a significant body of resources put forward by the academia in the form of books, articles, studies, available to policy makers and youth workers. These resources usually present basic research in the field of youth and offer information on the basic characteristics of the population (either youth considered as a whole or a segment, e.g. rural youth) and the challenges it faces. Other resources include official reports at the EU, Council of Europe, national and local levels, analysing and giving recommendations from the perspective of political goals and practical political measures. They are usually created through a wide consultation process that includes both young people and youth organisations, as well as the researcher's community. Different projects and initiatives are the key resources for young people and youth organisations. An additional and very important resource is linked to personal experience and accounts and that can be found in blogs, stories, and social networks, which are increasingly becoming a significant supporting tool for young people.

## **MAIN FINDINGS**

### **Civic engagement**

The field of monitoring, studying and supporting the link between civic engagement and learning mobility is only partially developed. The official documents state as being the key goals of learning mobility to address the development of democracy, the development of European identity among new generations, civic engagement and political participation.

Nevertheless, the existing tools and resources in the field do not provide a clear agenda, indicators, and toolkits for research, monitoring, improving, and mastering the wider spectre of learning mobility programmes.

The importance of this link has been recognised within the ERASMUS + projects and mostly explored within its mobility framework. Focusing on the participants of the ERASMUS + projects, RAY uses a developed sociological and political science methodology for longitudinal monitoring of the relationship between mobility and civic and political engagement, representing a good research example in the area. However, most of this research is focused exclusively on the participants taking part in learning mobility projects, not including the control groups of those who did not participate in the projects. Studies are also designed as post-hoc research and do not measure the effects before and after the completion of the mobility programmes. Most of small-scale projects do not measure these dimensions at all, or include only some aspects (for example, European identity). Small organisations, and short-term, mobility projects usually do not involve monitoring civic engagement practices during and after learning mobility activities. The analysis also points to a lack of standardisation of methodology (qualitative and quantitative) in this field.

The tools and resources analysed through this review recognise the effects of learning mobility at the individual, organisational and social level. However, the most developed indicators/measurements and tools regard the individual level. There are significantly fewer research and recommendations focusing on the organisational level, while the effects of mobility at the community have been even less explored.

Despite the wide variety of learning mobility projects, concrete sets of indicators measuring civic engagement and its relation to learning mobility, should be offered to youth workers for different length and purpose programmes.

## Quality

There are several resources on quality of learning mobility: reports, books, articles, as well as tools on quality standards. The general aims of these resources are to present and analyse the quality and the impact of mobility projects on the education system, on the institutions, and participants (learners and staff) in the education, trainings and youth sectors. Furthermore, these tools and resources also put forward recommendations to beneficiaries on how to improve the implementation, positive impact, and the quality of the programmes. These resources can be found mainly at the national and European levels.

Reports on quality of learning mobility are focused on the quality of outcomes and presentation of good practices. Furthermore, there is a contextual element to it since the quality frameworks of the learning mobility programmes tend to depend on each country context. In this sense, there are many reports, tools, as well as initiatives, and projects on learning mobility which are only available in national languages.

The key methodological approach of the reports are mixed methods, tracer studies, and online surveys.

Five quality dimensions are presented in the [Handbook on Quality in Learning Mobility](#), developed by the Partnership between the European Commission and the Council of Europe in the Field of Youth: rationale, organisation, formal framework, resources, and participants. The reports on Quality in Learning Mobility are mainly focused on organisational issues but also address impact both at the individual and societal levels. The other quality dimensions are not significantly present in the reports and sources.

The second limitation of the reports is the time frame: since 1950s learning mobility in the youth field was included among other major areas of the Council of Europe. The Council of Europe was the first international governmental organisation to address learning mobility in the youth field at the European level in 1956. Notwithstanding, the main reports on learning mobility present the situation after 2000s. In this sense, the main focus of these reports is Erasmus + programmes and projects and their impacts.

## Competences

Generally, based on the analysis of existing tools and resources, it can be concluded that it is acknowledged that the competences developed through learning mobility programs and projects have social effects. Notwithstanding, most of the studies do not delve in the details to reveal the levels and degrees of the developed competences and they mainly focus on the aspects of language and intercultural skills, European identity, and personal development.

The Competences developed in mobility projects are subject of a very specialised field which attracted limited research studies so far. Furthermore, it is largely based on the evidence of personal experience assessed through surveys. For example, there is abundant literature on mobility as a tool for acquiring intercultural competences, but apparently very little on youth workers' or teachers' skills for guiding that same development of competences. The existing evidence also shows that the impacts of mobility are mainly assessed at the individual rather than at the social level.

Other limitation can be found when analysing the target groups, i.e. the majority of the existent evidence is based on mobility students' surveys, while there is no reference to the competences of other mobile youth groups. This might not be the best approach to measure the social impact and youth competences, since generalised trends and findings can established only be established when the majority of the different mobile youth groups and the effects on those are researched.

When they are mentioned or addressed, competences and its links to mobility are weakly put in practice and rarely validated empirically or tested in different cultural settings and limited target groups. Therefore, there seems to be evidence to prove that more solid evidence, and a more substantial level of research in the field of competences, youth mobility and its social impact is valuable and needed.

## Social impact

The tools and resources regarding social impact of learning mobility are focussing on a) the impact at the individual level, and b) on the host society. At the individual level tools and resources are focused on highlighting certain effects and behaviours of participants after joining a learning mobility (especially in volunteering abroad or in studying abroad). This social impact should, in fact, be considered as indirect since it is not the learning mobility that necessarily leads to changes in terms of social impact, but it might have changed the behaviour or interests of volunteers or students, which induced a social impact. The more direct social impact is highlighted at the level of the hosting community or society. Here the impact on education, intercultural understanding, diversity or democracy is mentioned. Almost no direct social impact on the sending community is analysed, nor do tools and resources focus concretely in this field.

The studies focusing on Erasmus+ Youth in Action programmes (e.g. The impact of EVS on local communities, RAY-LTE, RAY-MON - presented in the table for civic participation) point strongest to social impact as described. However, evaluation studies on AFS, IVS, or American Youth Exchange also provide items which can be applied to evaluate and assess social impact.

Furthermore, tools for measuring social impact are available, as are online resources with information and collections of methods and tools, but these toolboxes do not focus directly on learning mobility, but rather in projects in general. Nevertheless, these approaches are still valuable to assess the social impact of learning mobility.

Policy briefs, developed in the Horizon2020 project MOVE, seem to hold special information value, since they address policy and ask for interventions and support even considering that they are based on rather general observations. In this sense, these political interventions could have a strong impact on fostering and increasing the social impact as described before.

## Youth policy

Recent youth policy documents on European level - either at the Council of Europe or the European Union - point to the value of intercultural dialogue (in youth work) and refer to mobility in (singular) general terms. This serves as an implicit support of learning mobility. Direct connection of European youth policy and learning mobility can be found in the Erasmus+ program and in the European Youth Strategy (both also regarding the European Solidarity Corps). In the youth policy of the Council of Europe, the Partial Agreement on the European Youth Card is the most influential document regarding learning mobility.

Having the insights for social impact of learning mobility and on youth policy in focus, it seems necessary that the implementation of experience after returning should be highlighted in future.

## Civic Engagement

Type of Resource	Name / (promoted /produced)	Content (description)	Purpose	Connection to other pillars	Other obs.
1	<a href="#">Student mobility and European identity</a> / DAAD	Special attention is given to the issues of whether and how Erasmus contributes to establishing a European identity among students.	The aim of the study was to foster various skills and competences of young people included in learning mobility projects and feeling of European identity in Europe.	2,3,4,5	Focus on identity
1	<a href="#">Handbook on quality of youth mobility projects</a> / EPLM	“A set of 22 quality principles for mobility, which constitutes a tool for reflection to frame the overall discussion of quality in mobility; A set of detailed 119 quality indicators that function as a targeted checklist for practitioners to ensure that learning outcomes of the project, as well as issues linked to inclusion, health and safety for participants, their active participation in the process, etc. are safeguarded; A quality handbook that underpins the principles and the indicators with more extensive explanations and references to relevant resources that provide further information, relevant tools, or examples of implementation in practice”	“The aim of the tools is to reach a clear and shared understanding of what concept of “quality in mobility” actually is and to develop concrete guidelines and definitions that can help practitioners to achieve better quality in the projects they are undertaking.”	2,3,4,5	General approach on measuring quality of the projects

Type of Resource	Name / (promoted /produced)	Content (description)	Purpose	Connection to other pillars	Other obs.
3	<a href="#">European Civil Society for Education ERASMUS+ Implementation Survey Results - 2017</a> / Lifelong Learning Platform	“Results of the survey is from a mix of European/international, national and local civil society organizations from 27 countries – all of the EU Member States, excluding Cyprus, Slovakia and Latvia – as well as Iceland and Turkey.”	The aim of the book was to research the experience of beneficiaries in the fourth round of the Erasmus+ programme.	3,4,5	General satisfaction, and focused on civic engagement mainly
3	<a href="#">Youth in Action Findings and Implications for Practice</a> / RAY	The study includes four areas: “1. The key principles of Youth in Action how they are expressed in the practice of the programme; 2. How learning takes place and practices of education and learning in Youth in Action; 3 the practice of project management in Youth in Action; 4. and the place of ideas about quality and practices related to quality in Youth in Action”	The aim of this brief is to give a summary of the data available in the RAY transnational studies.	3,4,5	Focused on Erasmus+/Youth in Action programmes
3	<a href="#">Good Practices on social integration of young migrants through participation</a> / ODIHR	The training manual comprises ten modules focusing on different aspects of the migrant integration process in receiving countries.	The aim of the tool is to share examples of good practices on the promotion of social integration of young migrants through different participation activities.	2,3,5	Focused on immigrants
3	<a href="#">Our Space: Online Civic Engagement Tools for Youth</a>	Research on interactive online civic engagement, exploring web pages and internet sites based around various web social tools.	The aim is to explore different forms of online civic engagement		Research on online civic engagement

Type of Resource	Name / (promoted /produced)	Content (description)	Purpose	Connection to other pillars	Other obs.
3	<a href="#">Learning mobility and non-formal learning in European contexts: Policies, approaches and examples</a> / Council of Europe	A book / collection of essays dealing with various aspects of learning mobility, including civic and political participation of young people.	General aim of the book is to contribute to current debates on the learning mobility of young people, and to exchange insights into quality factors and programme formats that contribute to the desirable impact of learning mobility schemes for young people	2,3,4,5	
3	<a href="#">Time to engage - Youth participation</a> / CIE Sweden	Using several non-formals tools and methods, the participants of the project „Time to engage“, (from 8 different countries) present their engagement in the booklet.	“The booklet is an important document for all dedicated youth workers and leaders, as well as interested NGOs, National Agencies, decision makers and citizens, who are standing for active participation of youth, especially, in the democratic processes in their local communities and in youth work.”		
5	<a href="http://lllplatform.eu/learning-democracy-and-myestory/">http://lllplatform.eu/learning-democracy-and-myestory/</a> / Lifelong Learning programme	Different personal stories about learning mobility experiences	“The campaign of young Europeans (and beyond) who tell their personal story, as an attempt to share reasons to develop the learning dimension of our societies and wake consciousness in the continent.”		
3	<a href="#">How European Voluntary Service Impacts Communities: Research Summary</a> / EVS, Agency of international youth cooperation	Research summary of main findings. Results, among others, show how do the people involved contribute towards the meaning of the programme and what impact does it have on them.	The aim of the research is to assess what happens in the organizations and the communities that host the European Voluntary Service volunteers.	2,3,4,5	National focus

Type of Resource	Name / (promoted /produced)	Content (description)	Purpose	Connection to other pillars	Other obs.
3	<a href="#">Study on the impact of Transnational Volunteering through the European Voluntary Service</a> / Directorate-General for Education, Youth, Sport and Culture (European Commission)	Comprehensive study about impact of EVS on individuals, organization and local communities. Special focus is also on participation in civic and political life of young people.	“The European Voluntary Service (EVS) Impact Study analyses the impact of EVS on individuals, organizations and local communities. It describes how 5 different types of EVS volunteers - ‘Standard students’, ‘Mediterranean students’, ‘Experienced workers’, ‘Disadvantaged jobseekers’ and ‘Western pupils’ - benefit differently from EVS.”	2,3,4,5	
3	<a href="#">The impact of European Voluntary Service projects on local communities</a> / EVS	Research summary of main findings. Results, among others, show how the people involved contribute towards the meaning of the programme and what impact does it have on them.	The aim of the research is to assess what happens in the organizations and the communities that host the European Voluntary Service volunteers.		
3	<a href="#">Assessment of the social impact of volunteering in HLF-funded projects: Yr 3 Heritage Lottery Fund</a> / Heritage Lottery Fund	Among other results, this research shows that "volunteering helps people to meet with others from different age groups, but there is only a mild effect on volunteers’ ability to get on better with those of differing ages. HLF volunteers have a strong sense of belonging and are extremely active in wider civic and civil life"	“The study examines the experience of volunteers within HLF-funded projects. The research is comprehensive and includes many relevant indicators related to learning mobility.”		National focus
3	<a href="#">Measuring the Impact of Youth Voluntary Service Programs</a> / The World Bank	The study consists of: review of the current research on whether mobility contributes to youth development, map of the gaps in existing research, and a framework for evaluating youth service programs.	One of the aim is to explore whether “youth service empowers young people to become more actively engaged in their communities and provides them with a means to do so, increasing the likelihood that they will stay involved in the future.“	2,3,4,5	

Type of Resource	Name / (promoted /produced)	Content (description)	Purpose	Connection to other pillars	Other obs.
3	<a href="#">Transforming Communities Through Service: A Collection of the Most Innovative AmeriCorps State and Volunteer Generation Fund Programs in the United States / Innovations in Civic Participation (ICP)</a>	The study addresses 32 case studies from 21 states in USA. The cases are grouped by issue area in which they impact, where civic engagement is one of the areas.	One of the aims is to find programs that provide opportunities for citizens to play an active role in addressing community needs.		
5	<a href="http://www.icicp.org/">http://www.icicp.org/ / Innovations in Civic Participation</a>	“Innovations in Civic Participation (ICP) is a global leader in the field of Youth Civic Engagement. ICP envisions a world where young people in every nation are actively engaged in improving their lives and their communities through civic participation.”		2,3,4,5	
2	<a href="#">Innovations in International Youth Volunteering / The International Forum for Volunteering in Development</a>	Forum regularly commissions and shares research on issues related to international volunteering that is relevant to its members and in the wider development discourse.	Forum regularly share information, and contribute in developing good practice and cooperation across the international volunteering and development sectors.	2,3,4,5	
3	<a href="#">Effects of International Volunteering and Service: Individual and Institutional Predictors / VOLUNTAS: International Journal of Voluntary and Nonprofit Organizations</a>	The paper recommends a model that suggests that effects for host communities, volunteers, and sending communities vary depending on individual and institutional characteristics and capacities.	Academic research paper		
3	<a href="#">Perceived Impacts of</a>	Findings in the paper suggest that	Academic research paper		

	<a href="#">International Service on Volunteers: Interim Results from a Quasi-Experimental Study / Global Economy and Development</a>	international service has an important role in promoting international perspectives, relationships and interests.			
4	<a href="#">DiscoverEU for all: travelling, learning &amp; volunteering / European youth forum</a>	The text represents situation of the European Youth Forum on the new DiscoverEU action for the Erasmus programme 2021-2027. It examines the proposal from a youth perspective and outlines proposals as to how to improve the action and make it aligned with the idea of youth organizations for the Youth Chapter.			
3	<a href="#">Young People And Democratic Life In Europe / European Youth Forum</a>	“The study looks in particular at the situation in six broadly representative countries, opting for “the most different” model of case selection: Croatia, Estonia, Georgia, Poland, Spain, and the United Kingdom were selected.”	This study offers an outline of the themes and trends around the subject of young people’s association with democratic life in Europe		
2	<a href="#">Study abroad for global engagement: The long-term impact of mobility experiences / Lifelong Learning programme</a>	The study employs tracer study and mixed methods research design. Survey results from 6391 study-abroad participants tell that to study in a foreign country has impact on five dimensions of global engagement (civic engagement, knowledge production, philanthropy, social entrepreneurship and voluntary simplicity)	The paper reports on the initial results of a research project ‘Beyond immediate impact: Study abroad for global engagement (SAGE)’, which look at the impact of studying abroad on various forms of global participation.		

Type of Resource	Name / (promoted /produced)	Content (description)	Purpose	Connection to other pillars	Other obs.
3	<a href="#">Study On The Impact Of Learning Mobility: Investigation Of The Impact Of Mobility On Language Skills, Intercultural Skills, Professional Skills And On The Sense Of European Identity / Lifelong Learning mobility</a>	The study is carried out by the project “Europe mobility” and explores the effect of learning mobility on different skills: language skills, intercultural skills, professional skills, and a sense of “European identity”. “The study compares self-assessment data between learners, who have been broad for at least one period for learning and/or working (mobile group) and learners, who have never been abroad for learning and/or working (control group).”	Aim of the study is to “improve the skills of young people particularly language skills, intercultural skills and professional skills in order to improve the employability of young people”.	2,3,4,5	small scale research
3	<a href="#">Erasmus+ Higher Education Impact Study / European Commission</a>	The study examines, the degree to which the expected effects of the programme occur and for which groups of applicants. The results are aimed to support further development of the programme and its design.	The main objective of the study is to evaluate the impact of the Erasmus+ programme on higher education students, staff and institutions across multiple dimensions.	2,3,4,5	Focused on Erasmus+ programmes and European identity
3	<a href="#">Exploring Erasmus+ Youth in Action Effects and outcomes of the ERASMUS+ Youth in Action Programme from the perspective of project participants and project leaders / RAY</a>	The analysis includes data on four ‘activity types’: 1 Youth Exchanges (YE; Key Action 1) 2 European Voluntary Service (EVS; Key Action 1) 3 Structured Dialogue (SD; Key Action 3) 4 Mobility of Youth Workers (YWM; Key Action 1) 5 Transnational Cooperation Activities (TCA)	This study presents a transnational analysis of the results from surveys between October 2017 and April 2018 with project participants and project leaders/team members involved in Erasmus+ Youth in Action projects.	2,3,4,5	Focused on Youth in Action programme

3	<a href="#">Long-Term Effects Of Erasmus+: Youth In Action Draft Interim Transnational Analysis 2018 / Ray</a>	The RAY study presents a transnational analysis of the results from surveys and interviews between 2015 and 2017 with project applicants and project leaders, as well as team members involved in E+/YiA projects.	The results of the study suggest that Erasmus+: Youth In Action programmes do contribute to participation and citizenship competence and practice of participants involved.	2,3,4	Focused on Erasmus+/Youth in Action programmes
2	<a href="#">Ray Research Projects / RAY-CAP</a>	The RAY-CAP research project includes several dimensions: <ul style="list-style-type: none"> <li>• competence development of youth workers and youth leaders in particular in the framework of E+/YiA;</li> <li>• transfer of learning outcomes from training and support activities to the youth work practice and policy;</li> <li>• transfer of learning outcomes from training and activities to organizations, platforms and networks;</li> <li>• long-term systemic effects of training and support activities</li> </ul>	The aim of the project is competence development and capacity building of youth workers and youth leaders involved in training/support activities in Erasmus+ Youth in Action. 16 RAY Network members were involved in the project.	2,3,4	Focused on Erasmus+/Youth in Action programmes
2	<a href="#">Ray Research Projects / RAY-LTE</a>	The RAY-LTE research project includes several dimensions: <ul style="list-style-type: none"> <li>• competence development through formal and informal learning in Erasmus+: Youth in Action projects, with a special attention on participation and active citizenship competences</li> <li>• long-term effects of participation and active citizenship practice.</li> </ul>	The research project examines participation and citizenship of the actors involved, development of participation and citizenship competences and practices. 10 RAY network members were involved in the project.	2,3,4	Focused on Erasmus+/Youth in Action programmes

Type of Resource	Name / (promoted /produced)	Content (description)	Purpose	Connection to other pillars	Other obs.
2	<a href="#">Ray Research Projects / RAY-MON</a>	<p>The RAY-MON research project includes several dimensions of interest:</p> <ul style="list-style-type: none"> <li>• the effects of projects on the participant, and organizations and on the local environments of these projects;</li> <li>• the access to Erasmus+: Youth in Action at the level of young people, organizations, bodies and groups in the youth field;</li> <li>• the profile of participants, project leaders, members and organizations;</li> <li>• the management of projects; • the process of implementation of projects</li> </ul>	<p>The project aims to contribute to monitoring and developing Erasmus+: Youth in Action and the quality of projects supported by it. The action is a cooperative activity of all RAY Network members.</p>	2,3,4	<p>Focused on Erasmus+/Youth in Action programmes</p>
2	<a href="http://www.ymobility.eu/">http://www.ymobility.eu/</a>	<p>Multifaceted international scientific research project</p>	<p>YMOBILITY develops a broad research programme which addresses the following issues: “(i) identifying, and quantifying, the main types of international youth mobility in the EU, and their key characteristics; (ii) understanding what determines which individuals do and which do not participate in international mobility as personal and professional development strategies: their motives, migration channels and information sources; (iii) analysing the individual outcomes in terms of both employability and careers and non-economic terms; (iv) analysing the territorial outcomes for the regions of both origin and destination, in economic, demographic and cultural terms; (v) differentiating between short-term and long-term outcomes, taking into account</p>		

			return migration and future intentions to migrate; (vi) identifying implications for policies in migration but also of education, the economy and housing.”		
2	<a href="http://move-project.eu/">http://move-project.eu/</a>	The general motivation of MOVE project is to provide a research-informed impact towards an improvement of the conditions of the mobility of young people in Europe.	The main research questions are: “how can the mobility of young people be ‘good’ both for socio-economic development and for individual development of young people? And what are the factors that foster or hinder such beneficial mobility?”

3	<a href="#">Everybody Counts! A Handbook on Inclusion and Participation of young people in Eastern Partnership Countries</a> / EaP CSF and NED	<p>The handbook has the following points as crucial: “ Lack of language skills and financial barriers present major obstacles to mobility. • Peer and family support, both financially and psychologically, can be crucial during the mobility experience. Mobility may occur as a result of a personal choice, collective decision making (family, peers) or institutionally (firm, company, school etc.) but the youth mobility experience must give young people some autonomy, and the organizations involved in mobility programmes must be transparent in their functioning.”</p>	<p>The aims of the tool is to tackle the youth inclusion and participation issues and to include them in the youth strategies and policies in Armenia, Moldova and Ukraine, and to contribute to the efforts of improving youth participation in the Eastern Partnership countries.</p>	2,3,4,5	
1	<a href="#">Partnerships for Participation</a> / International Falcon Movement-Socialist Educational International	<p>Handbook is divided into three parts: The first part presents the different concepts of children’s participation. The second part is more explicitly aimed at educators, where many tips for participation work are included. The third part includes educational methods on participation to use with children based on their experience.</p>	<p>The aims of the tool is to raise awareness of the significance of children and youth participation and to support educators in similar programmes.</p>

3	<a href="#">Erasmus... and what next? Tracer study on education and careers of Polish students participating in Erasmus mobility projects. [Poland] Foundation for the Development of the Education System (FRSE)</a>	<p>The analysis of career pathways of HE students participating in mobility projects under the Erasmus and Erasmus + programmes carried out by FRSE combines two research schemes: tracking (cross-sectional) and panel (longitudinal). The results presented in the report (see below) refer to the research carried out with the use of the tracking method. It was initiated in 2017 when a pilot study was carried out in a group of three thousand respondents. The first measurement began in November 2017 and ended in January 2018. The study showed how the transition from education to the labour market takes place; career pathways of Polish universities graduates; and how the mobility projects influenced the lives of their participants. Participants of mobility projects under Erasmus + and Erasmus programmes took part in the survey, i.e., students who studied abroad or completed apprenticeships there</p>	<p>The study aimed at verifying how the transition from education to the labour market took place, how the Polish university graduates' careers progressed and how motilities abroad impact the lives of grant holders. The study covered participants of mobilities under the Erasmus+ (Higher Education sector) and Erasmus programmes, i.e., students who had been awarded grants to undergo a study period or serve work placement abroad.</p>	5	
3	<a href="#">Is mobility the key to a successful career? Tracer study report on vocational learners with transnational mobility experience [Poland] Foundation for the Development of the Education System (FRSE)</a>	<p>The research refers to the issue of competence development, choice of vocational pathways of VET school students, as well as cultural and social aspects, including mobility aspects within the EU in terms of education, residence and work. The research was carried out in 2017 (desk research and development of methodology – first quarter of 2017   quantitative and qualitative research – second quarter of 2017).</p>	<p>The aim of the research was to collect information on the educational and career pathways of mobility participants within the framework of the ERASMUS programme (including Leonardo) in order to assess whether and to what extent programme mobility had affected the careers of their participants.</p>	5

1	<a href="#">HANDBOOK ON QUALITY IN LEARNING MOBILITY</a> <a href="#">Partnership between the European Commission and the Council of Europe in the field of youth</a>	<p>The handbook presents quality framework of the LM: 22 principles, 119 indicators in 5 dimensions: rationale, organization, formal framework, resources, participants,</p>	<p>“In recent times, learning mobility has received growing recognition as a valuable educational tool. More and more young people and other actors are getting involved while more and more funds are being made available for learning mobility projects. While this is a very positive fact, and comes as a recognition of the value of learning mobility for young people in the youth field and in non-formal learning contexts, it inevitably brings the issue of quality to the fore, since how can we ensure that this investment we are making in learning mobility – in terms of time, efforts and money – actually brings about the results that we are aiming for? By trying to answer this crucial question, through this comprehensive set of tools, our ambition is to ensure that quantity of learning mobility activities in the youth field does not come at the detriment of their quality.”</p>		
3	<p>Conceptual background paper  Quality in learning mobility</p>	<p>“This background paper will therefore initially and in a very general way examine notions of quality and hold these up against the phenomenon of learning mobility with a view to eliciting the questions that can frame the discussion. Afterwards, it will try and provide answers – or perhaps more humbly: steppingstones to the answers – by drawing on relevant policy and practice, as well as theory and evidence.”</p>	<p>“This paper is designed as an input to the discussion on quality in learning mobility in the context of the European Platform for Learning Mobility (EPLM). It is accompanied by a draft for a concrete quality framework (quality criteria for learning mobility in the field of youth).”</p>

4	<a href="#">Towards an Erasmus School Mobility Charter</a>	Charter holders should meet certain criteria (i.e.: inclusion of newcomers and evidence of outreach, quality of learning mobility, experience in the development of internationalisation plans for educational institutions, and experience in managing grants), in order to submit simplified KA1 applications with a consortium of partners (such as schools, pupil exchange organisations, and public authorities) which could vary over the years	An Erasmus School Mobility Charter could be a way for organisations experienced in pupil and/or school staff mobility to support and reach out to schools struggling to use the programme, and access a simplified procedure to apply for a number of mobilities every year under Key Action 1 (KA1), for the whole duration of the funding programme.		
3	<a href="#">The Quality Observatory &amp; Toolbox for Mobility</a>	“This publication offers an overview on various initiatives and projects accomplished across Europe to support quality in learning mobility. This document is focusing on the Quality Observatory and Toolbox for mobility, developed by the following steps: 1. Collecting and analysing good practices 2. Defining a framework to map the good practices 3. Selecting the quality criteria to define quality in mobility 4. Collecting the methods to realize quality in mobility 5. Selecting the indicators and benchmarks to measure quality in mobility. “	“This publication represents a tool to support and promote quality in transnational learning mobility.”		

## Competences

Type of Resource	Name (promoted /produced)	Content (description)	Purpose	Connection to other pillars	Other obs.
4	<a href="#">“Determinants and Impacts of Student Mobility: A Literature Review”</a> , Margarida Rodrigues	The report presents a brief history of the European Union (EU) support to student mobility, an overview of the trends in student mobility, a conceptual framework to analyse mobility, the determinants and impacts of student’s mobility.	To give a short review of mobility determinants (socio-economic background, language skills, general motivations, etc.) and impacts (labour market outcomes, language, personal and cultural outcomes, identity).	4	This report reviews the existent evidence on the factors that determine the decision to study abroad and the impacts of that decision mainly at the individual level.
3	<a href="#">“Study on the impact of learning mobility: investigation of the impact of mobility on language skills, intercultural skills, professional skills and on the sense of European identity”</a> , Eva-Maria Kropp - European project “Europemobility”.	The study provides insight in distributions of data in the mobility group and in the control group; the study supports several assumptions about the impact of mobility on the learner’s skills and competences as well as on learner’s “European Identity”.	To investigate the impact of learning mobility on language skills, intercultural skills, professional skills as well as the impact on a sense of “European identity”. The objective of this study is to analyse the impact of mobility on the development of skills and competences of learners.	4	The study is focused on one target group – students. Only language skills, intercultural skills, and professional skills have been analysed in the report.
