Timeline

- Piloted at a few schools for several months
- District Email out 3/28/18
- Active/optional for all at this time
- Current SSO (Blue Page) Active until middle of summer break

Criteria

- District Wide/Multiple School Use
- On Software Standards
- Web Application

Key Info

- Applications (Icons) Will Grow
- Behavior changes depending on the application
- Differ between users (student, staff, location)
- Behavior differs between browsers
- Behavior differs with generic account
- Website best customization tool outside of SSO
- WorkOrder: School Wide Homepage

Applications Will Grow

As the icons grow customization of the view and favorites will be important.

Behavior is Different with Applications

Because of security some items will
require an additional log in.

List Includes: Synergy

Differ Between Users

The applications will vary depending on if you are a student, staff, access, location.

-This will become more apparent as the project expands.

Staff Handout

[PDF Link](#)

Staff Items (See Handout)

- Replace bookmarks
- Searchable Staff Directory
- Favorite Apps Option

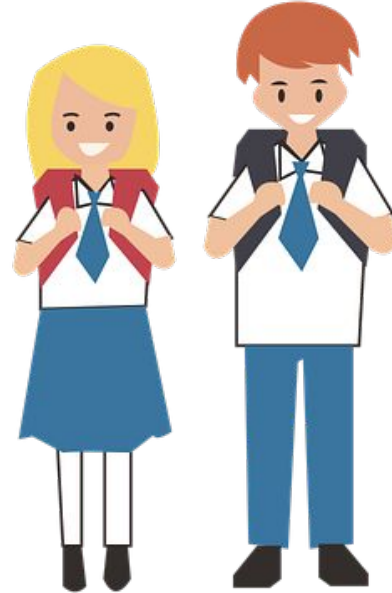

With added simplicity
comes responsibility!

Behavior differs between browsers

In most cases IE passes on credentials from log-in from the computer.

Chrome requires an additional login up front on the first time each day.

Chrome performance will improve when the blue SSO page is decommissioned.

Behavior differs with generic account

Because IE passes on credentials from the log-in of the computer anyone wanting to use SSO will need to use Chrome.

*See back of Student Handout

Behavior differs with generic account...continued

Students will need to log out of each application because they are in a shared environment.

Closing the browser between students is also best practice.

Website best customization tool outside of SSO

For student links that fall outside of SSO that students use school website is best.
