

Thinglink

What is Thinglink?

Thinglink was created in 2010 in Finland and it's an app that lets you add notes, audio, video or photos to your image

- Thinglink helps students create interactive projects about any desirable topic
- An easy way to show your creativity
- The final product is educational and unique

How to use Thinglink?

1. First you need to upload any picture that you want to work on
2. When you do it you'll see a red dot on the screen
3. Tap the red dot to add notes or audio to your photo
4. If you need to add more you can tap anywhere on the screen and the app will ask you if you want to upload a photo, add audio or a note
5. When you're done you'll have your unique homework done and when you're done you can share it with the world
